ManufacturerBosch

Description

Easy clean interior, remove the shelves and rails, clean the inner glass and then set oven to the cleaning program. The pyrolytic SelfCleaning cycle heats the oven to 480?c reducing any dirt to ash which can simply be wiped away once cooled.

Steam function
By adding steam when baking or cooking dishes like bread, your food comes out even better and more tasty. Steam prevents drying out of food, provides a deliciously crispy crust and keeps the bread fluffy from the inside. Simply fill the requested amount of water in the removable supplied water bowl which is integrated in the oven bottom and set the heating mode “hotair steam”.
