

## Russell Hobbs "Attentiv" Toaster (Stainless) (26210)

More than just a stylish toaster, this 2 slice model from Russell Hobbs features a sensor that gives you a more consistent browning level, most other toasters use a timer to control the browning level and don't take into account the type or age of the bread, this can lead to inconsistent results. This 'attentive' model monitors the surface temperature of the bread and gives a more consistent result.
